

Commercial Cybersecurity Solutions:

The **National Cyber Exchange (NCX)** and its **Certified Technology Solution Providers**, have teamed-up to provide you with a comprehensive approach to Commercial Cybersecurity for your Business...

WHAT is Cybersecurity?

Cybersecurity involves the protection of a company's IP information, data, documents, and information systems hardware, software from theft or damage. What most businesses overlook is that cybersecurity includes "human behavior", IT security, network protection, policies and best practices as well.

WHY is this important to me?

Source IBM – The 2016 BDO Manufacturing RiskFactor Report

With the CyberRMI Program you receive these benefits:

- A free 1st year membership as a "CyberCitizen" to the NCX Website & Cybersecurity Forum with Mobile Apps for cybersecurity alerts, education and training resources.
- A cloud-based cyber assessment to identify vulnerabilities within your company and your supply chain using the free "Cyberfense" Survey.
- A free IC²E™ (Imprimis Cybersecurity Compliance Essentials) Readiness Survey and Report for both NIST 800-171 and the IC²E™ Commercial "CyberStart" Baseline Compliance Program

Receive discounts on optional "Package Cybersecurity" Solutions for your company:

- If you need to bring your company into full compliance with the DFARS, FAR, and NIST 800-171 requirements the "i2Express" Package from Imprimis meets DoD contract compliance at reduced costs.
- If your company does not require full compliance with NIST 800-171/DFARS or FAR, we can implement the optional IC²E™ Commercial "CyberStart" Baseline Compliance Program with Corporate Fiduciary Risk Management and Cyber Insurance.

About The NCX:

The National Cyber Exchange (NCX) is Your Trusted Source for Cybersecurity Information.

As a nonprofit member organization, we are dedicated to improving cybersecurity by sharing cyber threat information, providing cyber education to citizens, engaging in secure network and cyber best practices for businesses and executives, supporting member training, protecting critical infrastructure and IT operational needs through advanced technology development. For More Information see our NCX Information Page at this URL: <https://nationalcyber.org/cybermi>

With the CyberRMI Program you have access to these optional services from NCX and its Provider Partners:

- Cyber Insurance at most favorable rates based on your "improved" cybersecurity posture and profile.
- Discounted personal ID Protection for each of your employees through NCX and IDShield.
- Low-cost monitoring and vulnerability scanning for long term cybersecurity sustainment needs.

Are Cybersecurity threats holding you or your company back from investing in secure digital technologies?

Take control of your company's connection to the Internet and Safely and Securely, join the age of digitalization in Commercial Cybersecurity Protection...
